Maria
Publishers
Pvt. Ltd.

DIGIMARIA

Android and iOS App

Digimaria is Maria's digital bookshelf for e-learning. It contains digital contents like E-books, Animated Videos, Interactive Tasks, E-clicks, Lecture Videos and Slideshow Videos. It is available on both Android and iOS platform. It is exclusive for teachers and students availing Maria's products. The content can be downloaded and used offline.

HOW TO USE?

INSTALL

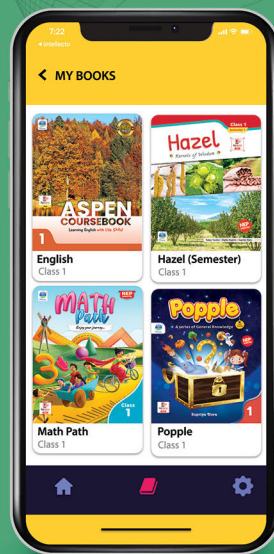

Download and install the app on your device from Google Play Store or App store or scan the QR code given in your textbook.

ACTIVATE

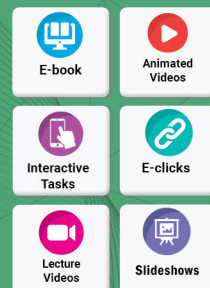

Enter your mobile number and create an account by entering the OTP received for verification.

LET'S LEARN

Once the verification is done, scan the QR code given on the content page of your book to view and download the digital contents!

DIGITAL RESOURCES

DIGIMARIA Web Platform

Our web platform makes teaching and learning easy and interesting. It contains supporting materials for teachers like Teacher's Manual, Test Generator, Syllabus, Question Papers, Worksheets, Key Answers. It is exclusive for teachers and students availing Maria's products. The supporting materials can be viewed and downloaded.

Support and Help Desk

To get assistance or verify the compatibility of your device and device specifications, kindly call to +91 63844 00011 or drop a mail to itteam@mariapublishers.com.

TEACHER RESOURCES

Our Dictum: Empowering Mankind

We are a budding publishing organisation, and the first leap into our visionary journey was made in 2004. We started off with a series of writing which moved onto kindergarten and finally extended to core and non-core books.

We believe in planting good values in students since these are the distinguishing factors of their lives. Value-building education is the basis of a man's life. Just like how a sophisticated building is protected by a strong foundation, the fundamental step in empowering mankind is empowering the students' network. Our views resonate with Dr. Abdul Kalam in that thinking should be our primary asset, whatever situation we go through in life, whether positive or negative. We believe that asset which is inevitable for a person should be cultivated when the person is young. Whatever we sow in a young mind will blossom all over the society and benefit mankind as a whole.

Why we stand out

- ✓ Our aim in presenting education as a great means of support for students' lives.
- ✓ Our admirably rich, creative and dynamic content design and development team.
- ✓ Our organization's motto, which is teamwork.

We have travelled a long way to make our name conspicuous. We don't say we are renowned or that we are the pioneers but we intend to make a change. We have a strong vision and we are dedicated towards fulfilling it. We work towards igniting the spark of reasoning in young minds.

We are 'MARIA PUBLISHERS'.

Unbox Space

Nursery

Unbox Space - Experience this wonderful world with the powerful instinct of our senses. It gives an opportunity to unleash the complete potential in children. Our senses curate the basics of learning from its inner being - via sensory, cognitive and motor skills. To unbox - means to look within and go beyond the captivity of boundaries. Let's create and learn through our own awareness. The first stage of children's early development is the pure awareness of their five senses. Through this awareness, they learn about the world.

Our five strong senses:

Eyes – Unbox Vision: Signals to see beyond

Ears – Unbox Sound: Listen to perceive

Nose – Unbox Smell: Detects inner instincts

Tongue – Unbox Flavours: Contact different variety in knowledge

Skin – Unbox Emotions: Emotional responses around us

Through this kit, we intend building a strong and an innate environment of learning. This book features easy-to-learn concepts in the areas of simple fun-to-do activities. The 5 beans help the child unbox the simple learning of life.

Hazel (Term)

Class 1 - 5

Our term series, Hazel, Kernels of Wisdom, is a collection of 15 books for different subjects. Parallel to how the Tree Hazel symbolises profuse qualities like wisdom, inspiration and learning, our term series branches out to diverse subjects, including English, Mathematics, Environmental Studies/ Science & Social Science, and General Knowledge. With careful conception, we have developed it for Grades 1 to 5, adhering to a maximum of three books for each grade. The entire series includes the essence of the New Education Policy (NEP) 2020. We have built the Hazel series to withstand the passing of time, aiding students to retain the knowledge gained and build thriving skills through scrupulously graded content and pertinent illustrations, similar to their counterparts known to extend their lifetime up to several hundred years.

Behind the title:

Hazel is a tree that symbolises wisdom, inspiration and learning. Its reputation for being a magical tree is well known in ancient stories.

Amuse (Term)

LKG & UKG

To kindle the curiosity and engage the wit of young minds is a solid thing, but we have taken an innovative leap to do this. AMUSE, the kindergarten series is erected to cultivate knowledge in an enjoyable way. The knowledge gained at this phase of life is the sparkle that can ignite the fire. As the name of this series suggests, it AMUSEs the students by its enchanting features and hence it is a KIDS' HAPPY ZONE.

Windows to Science

Class 1 - 5

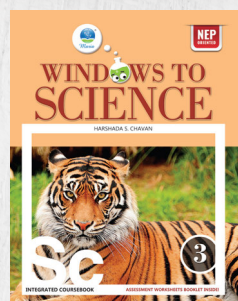

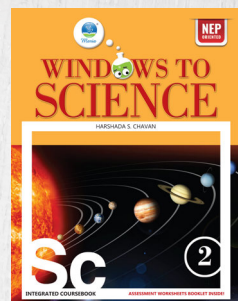

Windows To Science series is a comprehensive learning programme for science for Classes 1 to 5. This series teaches the core concepts through day-to-day examples and activity-based learning methods.

Illustrations, activities and experiments help the students relate their theoretical knowledge with practical applications in their daily life.

Some of the salient features of the series include:

- Learning objectives – Outline of the topics discussed in the chapter
- Glossary – Recap of new concepts/terminologies introduced in each chapter
- Mind map – Summary of the chapter in the form of a flow chart
- Factoids/Snippets – Interesting trivia about key topics discussed in the lesson
- Experiments and activities – Hands-on activities to reinforce concepts through practical learning
- Higher-order thinking skills (HOTS) – Encourages critical thinking and analysis
- Exercises – Test whether the students have grasped the concepts taught in the lesson

Grow Green (Environmental Science)

Class 1 - 5

Environment plays an important role in the development of a child to a great extent. It also plays a relevant role in shaping one's personality. So, children must know their surroundings so that they may shape themselves as per the need of the hour at a large extent.

Grow Green (Environmental Studies) is a package of five books (from Class 1 to Class 5).

Social Science (Maps and Mind Maps)

Class 6 - 10

Social Science Maps and Mind Maps have been designed according to the revised syllabus of the Government of Tamil Nadu. This book contains mind maps for all the chapters and solutions for map activities given in the textbook.

Mind maps provide an overview of the chapters and will help the students recapitulate all the important points they have learned. Model maps have been provided with clear markings of the points and regions to make learning easy. Each model map is followed by a map for practice. This workbook will help the students develop the habit of self-study and independent work, which gives them the opportunity for self-development.

Social Science (Map Book)

Class 6 - 10

Social Science Map Books have been designed according to the revised syllabus of the Government of Tamil Nadu. Solutions for all the map activities in the books have been provided as model maps with clear markings of the points and regions for easy learning. The model maps are followed by maps for practice.

At the end of the books, some additional maps are also provided for practice. This series will help the students develop the habit of self-study and independent work, which gives them the opportunity for self-development.

Click'r (Windows 7 & MS Office 2010)

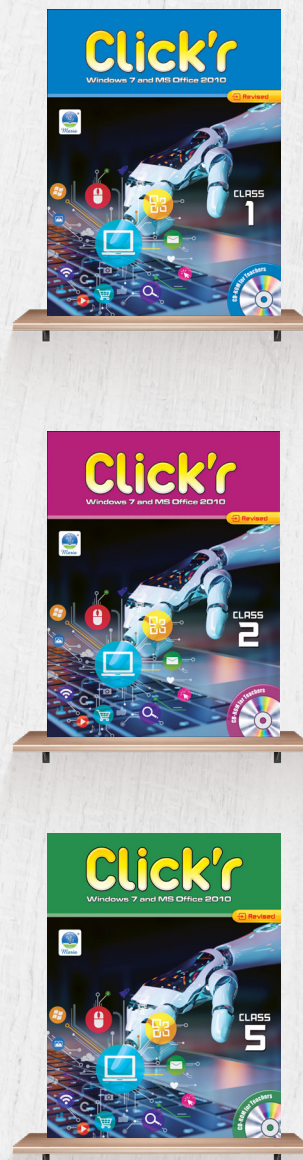

Class 1 - 9

Computation is now an essential part of modern life. Every day we write mail, share photographs, play music, read the news and pay bills using our personal computers. Engineers use computers to design cars and airplanes, meteorologists use computers to predict the weather, pharmaceutical companies use computers to design new drugs, and investment firms use computational models to predict whether complex transactions are likely to succeed.

Modern astronomers also rely heavily on computation. Computers perform calculations that track the movement of planets, asteroids and comets, keeping an eye out for bodies that pose a potential hazard to the Earth.

The emphasis is on how computation helps people to know basic concepts in computer science. This series is based on Windows 7 and covers MS Office 2010.

Nurture (Enrichment of Values)

Class 1 - 8

Nurture is a series of eight attentively graded books (Class 1 to 8) that are structured taking into consideration the receptive ability and mental aptitude of the children of different age-groups. This series inculcates moral values in children in a practical way and allows them to opt for the opportunity to explore and experience their own strengths, abilities and qualities.

Our life is simply the creation of mind. Once we nurture our minds with beautiful thoughts and seed good values in it, our life becomes beautiful and successful. A mind filled with positive thoughts, creativity and virtues, such as integrity of good characters and love, is always the source of peace and happiness all around. This series helps to nurture beautiful souls with such great thoughts. This series assists the children to explore values such as honesty, respect, affinity, self-esteem and generosity with the environment and seeds positive attitude; gratitude; and passion for success and happiness in children. It also covers affection, compassion and devotion to tolerance and concern for social commitment.

Peep in

Class 1 - 8

With the age of the Internet, information on any topic is readily available online. The emphasis on general knowledge has changed from merely gathering information to an evolved state where how well the information is curated, presented and assimilated which has garnered importance. Every topic leads to a new horizon being opened and draws curiosity to embark on a journey to learn more about it. This book attempts to bring several fascinating topics into focus and touches upon many interesting dimensions to them. This will enable the reader to widen their perspective, explore their interests and help them learn the art of assimilating facts about a range of topics.
